

SMART HOME: Android Developer

JOIN the team that makes the SMART-HOME concept REAL!

See what you can do with our embedded platform (<http://www.getvera.com>) and how it can be customized (<http://www.mios.com/success-stories/>)

We are looking for an open minded and talented Android Developer for a full time job in our office in Iasi.

As our colleague, you will be able **to put your mark** on our user interface (The NEW 7th version), you'll be part of a dynamic team, full of initiative and you will have the opportunity to put into practice your skills and experience, also you will enter in the HOME AUTOMATION INNOVATORS COMMUNITY- which we coordinate (the directions and the ideas).

Your job will be to enhance existing apps and build new ones.

You will manage the full life cycle of the mobile apps development: designing, coding, documenting and testing.

Job Requirements:

- Full time availability
- Good English speaking and writing capabilities
- Develop & enhance new apps, customize our apps according to our customers specifications using the latest technologies.

Desired Skills and Experience:

- Experience with Android development – minimum 1 year
- Experience with Java SDK , Android API and Android NDK
- Experience with socket programming on Android
- Experience with OpenGL

- Experience releasing at least one application in Google Play / Android Market
- Strong scripting skills
- Solid understanding of the full mobile development life cycle

Would be a plus:

- Ability to understand and parse XML, JSON and Serialized data
- Familiarity with HTML5, CSS3 and JS.

Benefits:

- Working in **international HOME AUTOMATION teams** for international clients
- **Significant prestige** because you will be the one of those who DEFINE THE FUTURE of IT
- **Motivating and competitive salary package**
- **Dynamic professional environment** in an international company
- **Opportunity to offer your ideas**, be listened to and see them implemented
- **A team where work is always fun** and fun becomes a requirement in the job description (See our parties)
- Sponsored **sport activities + Health Insurance** – We appreciate our health
- **Career development opportunities**
- **A home automation kit** which will make your house smarter and offer you control over it, no matter where you are
- An excellent opportunity to work with real life devices, sensors and low resource environments. **You will be a real engineer.**

Meet our team and stay in touch for more information on home automation!
